

CIP 23: West Side Reservoir #2

Project Cost: \$3,960,000

Project Priority: Low

Project Description

For additional storage and redundancy, a second reservoir will be added to the West Side Reservoir site. Additional land may be needed for a second tank, but since some of the site work has already been completed when the first reservoir was installed, this additional reservoir could be designed and constructed for a lower cost and provide a significant benefit to the central and western parts of the system, the Odell area, and the Hood River Intertie.
